

Alexis Orellana

Senior React Native Developer & Mobile Solutions Architect

Senior React Native Developer with 5+ years of software development expertise, specializing in mobile applications for the past 3+ years. Successfully delivered high-impact solutions including El Salvador's national cryptocurrency wallet serving 4+ million users. Expert in React Native, TypeScript, Redux, and cloud services (AWS). Proven track record of leading cross-functional teams, architecting scalable applications, and implementing performance optimizations that reduce load times by 40%. Passionate about clean code practices, automated testing, and delivering solutions that solve complex business challenges.

Experience (7 years 2 months)

Apr, 24 - Jan, 26
1 year 9 months

Senior React Native Engineer Tractics

Develop mobile applications for Tractics construction management platform, serving contractors across North America. Architect and implement scalable React Native solutions that streamline construction operations and enhance project efficiency for heavy civil construction teams.

- Architect and develop React Native applications using TypeScript, Redux Toolkit, and modern performance optimization techniques
- Participate in technical code reviews and collaborate with senior developers, contributing to team code quality improvements
- Collaborate with UX/UI designers to implement responsive designs optimized for tablets and mobile devices in harsh construction environments
- Optimize app performance for battery life and data usage, critical for all-day field usage by construction crews

[Tractics Construction Platform](#) | Enterprise-grade construction management mobile application serving contractors across North America. Features real-time project tracking, crew management, time tracking, and seamless integration with heavy civil construction workflows. Optimized for rugged field use with offline capabilities and cross-platform compatibility.

Senior React Native Developer - FinTech AlphaPoint

Contributed to frontend development for Bitcoin Chivo wallet, El Salvador's groundbreaking national cryptocurrency application serving 4+ million citizens. Collaborated with development teams and government stakeholders to implement secure financial technology at national scale.

- Architected and implemented critical features using React Native, Redux, and TypeScript for a national financial infrastructure
- Developed secure biometric authentication and encryption workflows handling millions in daily transactions
- Implemented CI/CD pipelines reducing deployment time by 40% while maintaining rigorous security standards
- Optimized app performance and improved user experience metrics
- Contributed to internationalization efforts supporting multiple languages for diverse user base across El Salvador

[Chivo Wallet](#) | El Salvador's revolutionary national cryptocurrency wallet, the world's first government-backed Bitcoin application. Features secure biometric authentication, real-time Bitcoin/USD transactions, push notifications, and nationwide ATM network integration. Serves over 4 million users with enterprise-level security and performance.

Lead Mobile Developer & Technical Lead

IdeaCodex

Led cross-functional development teams of 5-7 developers delivering mobile and web applications for enterprise clients. Established technical architecture, development workflows, and served as primary technical liaison with stakeholders.

- Architected React Native applications with advanced state management using Redux and Context API
- Implemented comprehensive CI/CD pipelines improving deployment frequency by 50%
- Designed offline-first mobile applications with optimized data synchronization strategies
- Established code quality standards and mentoring programs, raising team performance metrics by 35%
- Led technical requirement gathering and solution architecture for complex enterprise applications

[HR Payroll](#) | Comprehensive Human Resources Management platform featuring payroll processing, employee management, time tracking, and reporting capabilities. Built with Laravel backend, MySQL database, and deployed on AWS EC2 with Docker containerization for scalability.

Development Tools

★★★★★

Git | GitHub | GitLab | Xcode |
Android Studio | Postman | VS Code |

Full Stack Mobile Developer

10x informatica

Contributed to complete software development lifecycle, from analysis to deployment of mobile applications using React Native. Successfully delivered consumer mobile app achieving 1,000+ active users on Google Play Store with 4.2+ star rating.

- Developed React Native applications with advanced state management, component lifecycle optimization, and performance tuning
- Implemented complex navigation flows with role-based access control and user permission validation
- Built RESTful APIs and backend services with complete user authentication, authorization, and session management
- Designed and developed responsive web applications using modern frameworks, CMS platforms (WordPress, Magento, Moodle), and e-commerce solutions

[Canjeaton Application](#) | Innovative mobile commerce application featuring product catalog, user rewards system, and secure payment integration. Built with React Native frontend, Redux state management, and Laravel backend API. Successfully launched on Google Play Store with 1,000+ downloads and positive user reviews.

Education

2012-02-01 - 2020-06-30
