

Alexis Orellana

React Native Developer

I possess a diverse skill set encompassing the analysis, design, and development of robust software applications. My current area of specialization revolves around creating innovative and high-performing mobile applications using React Native. With over five years of experience in software development, I have accumulated extensive knowledge in various technologies, including the Laravel Framework, Git, Linux, PHP, Docker, MySQL, AWS (EC2), OAuth, Redux, and TypeScript. This breadth of expertise enables me to tackle complex challenges and deliver tailored solutions that exceed client expectations. In addition to my technical prowess, I am highly proficient in problem-solving and possess a keen eye for detail.

Work History

Mar, 22 - Apr,24

React Native Software Engineer

2 years

AlphaPoint

The El Salvadoran government partnered with AlphaPoint to develop the frontend and backend infrastructure that powers the Chivo bitcoin wallet, the world’s first national crypto wallet.
